

Propose a Project

Do you have an idea on how to utilize clean fuels in your fleet? Would you like to use innovative technologies to reduce emissions from your vehicles? Do you have a proposal to reduce the amount of miles driven by your organization? If so, the Clean Fuel Partnership would like to hear about it!

The Clean Fuel Partnership regularly receives notices for federal and state funding programs and is in the process of developing a project database in order to take advantage of the various funding opportunities. If you would like your project included in our database, please complete our Project Proposal form and submit it to:

Electronically: slcfp@norpc.org

By fax: 504-568-6643

Or by mail: Southeast Louisiana Clean Fuel Partnership 1340 Poydras Street, Suite 2100 New Orleans, LA 70112

The Clean Fuel Partnership will notify you before we include your project in an application for state or federal funding and discuss the requirements connected to the potential funding (for example: local match required, reports to be submitted, documentation of how funds were spent, etc.).

Please keep in mind the timeline to receive funding is usually at least one year from the state/federal application deadline. Funding is not guaranteed. However the more detail you include in your Project Proposal, the more attractive our application to the funding agency will be. If you would like to search federal grant opportunities, please visit: www.grants.gov.
